CallsTalk Portal Handover Guide

October 27, 2026

1. Welcome

The CallsTalk portal is where the team keeps each buyer's billing up to date, shares each day's call log with them as a **Call Summary**, and sees at a glance who has paid and who still owes. Buyers log in to the same portal to see their balance, view and download their Call Summaries, and pay online.

This guide is for the people who run the portal day to day. It walks through each task with screenshots, and section 6 shows the report formats to use so the portal can read your reports.

Who can do what

Role	What they can do
Admin	Everything: logins, billing terms, daily calls, payments, reports, the Finance page, notices and settings
Staff	Upload and remove Call Summaries and billing reports for buyers. Staff never see or change billing, payments or logins
Customer (buyer)	Sees their own balance, last five days and Call Summaries, and pays online

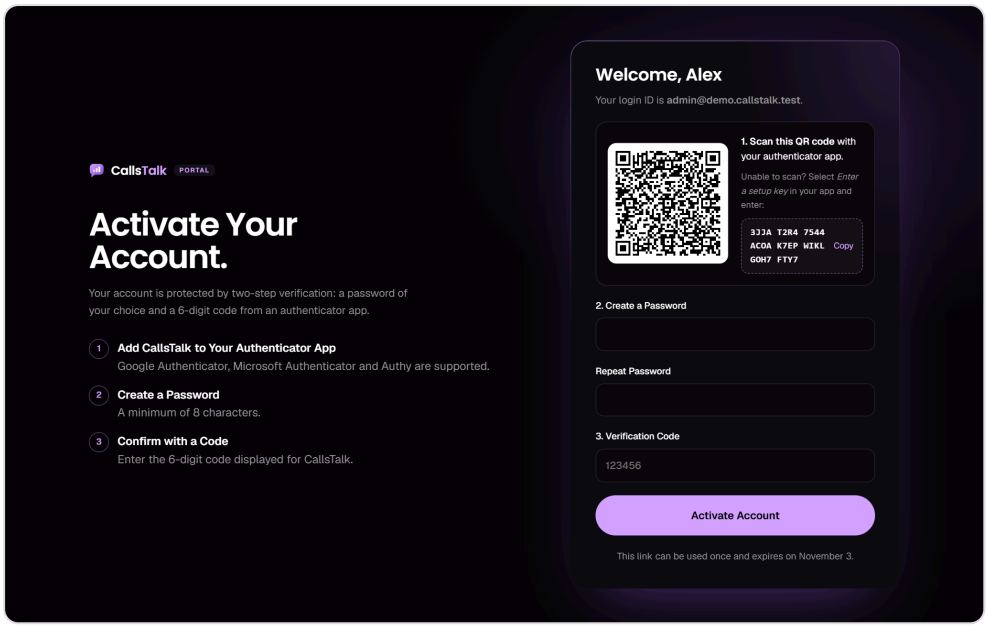

The one rule behind every figure: each day, the portal charges the billable calls (total calls minus replacements) at the buyer's price, adds any payment received, and carries the balance into the next day. Every page, email and Telegram message uses this same rule, so the figures always agree.

2. Getting started

The portal is at **portal.callstalk.com**. Every login uses two steps: a password and a 6-digit code from an authenticator app on your phone (Google Authenticator, Microsoft Authenticator or Authy).

Activating a new login. Each new person gets an email with a setup link. The link works once and expires after 7 days.

1. Open the link. The page shows a QR code.
2. In your authenticator app, add an account and scan the QR code. If you can't scan it, type the setup key shown beside it.
3. Choose a password of at least 8 characters, and type it twice.
4. Enter the 6-digit code your app now shows for CallsTalk, then select **Activate Account**.

The setup page a new person sees when they open their link

Signing in after that. Enter your Login ID (your email address) and password, then the current code from your app.

- **Forgot your password?** Select **Forgot password?** on the sign-in page. A reset link is emailed to you.
- **Lost your phone or authenticator app?** An admin opens your login and selects **Reset Login and Send Link**. You get a fresh setup link.

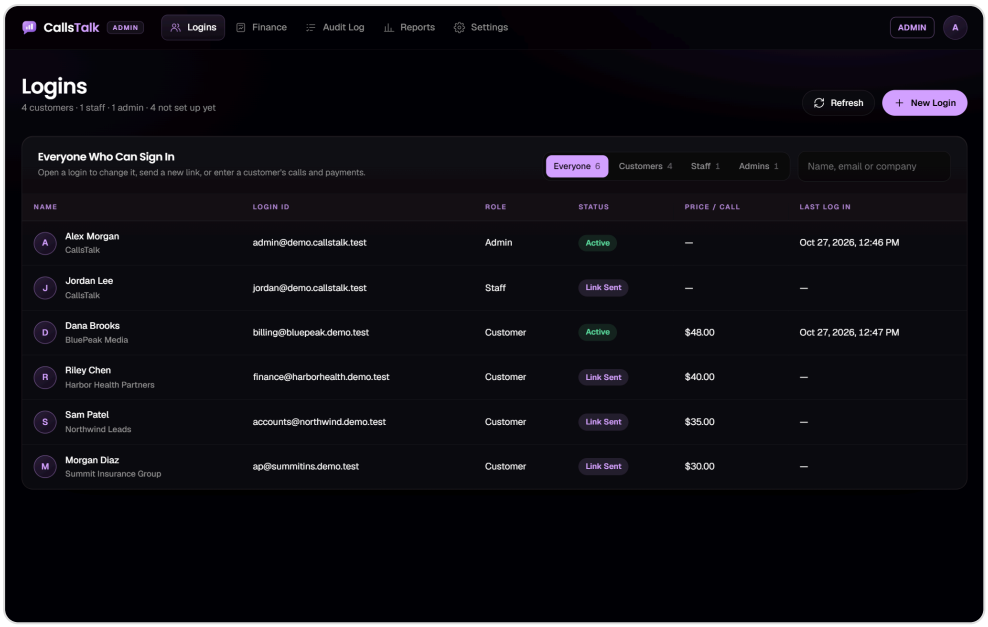

The admin menu. Across the top: **Logins** (everyone who can sign in), **Finance** (who owes and who has paid), **Audit Log** (who did what), **Reports** (upload and manage buyers' reports) and **Settings** (your password and the team's notification settings). Staff see only **Reports** and **Settings**.

3. Customers and billing

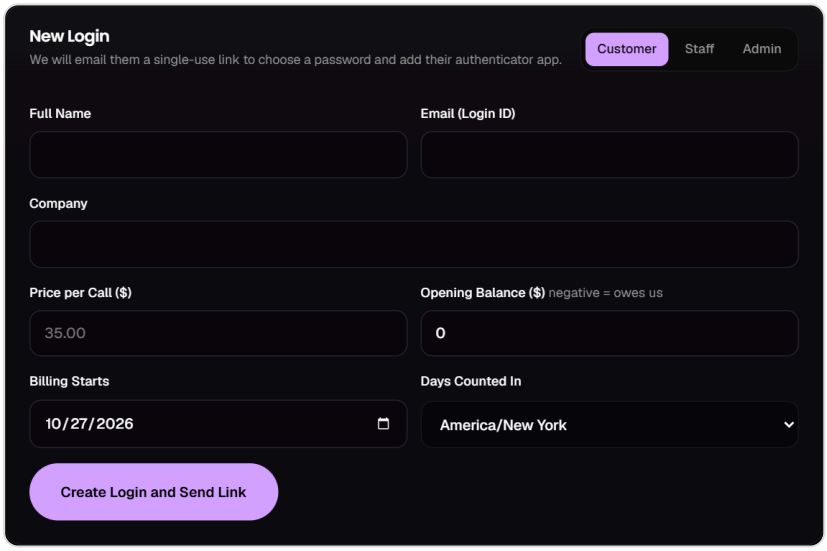

Each buyer's balance comes from three things you enter: their **billing terms**, their **daily calls**, and their **payments**. The portal does all the arithmetic.

Adding a buyer

On **Logins**, select **New Login** and pick **Customer**. Fill in their name, email (this becomes their Login ID) and company, then their billing terms. Select **Create Login and Send Link**, and the buyer is emailed their setup link.

The Logins page lists everyone who can sign in, their role, status and price

New Login: a customer needs a price per call, an opening balance and a start date

Field	What to enter
Price per Call	What one billable call costs this buyer, in US dollars
Opening Balance	Where the buyer stands on the start date. A positive amount is credit; a negative amount is what they already owe
Billing Starts	The first day the portal counts. Earlier days are ignored
Days Counted In	The buyer's time zone, so "a day" means their day

To add a team member instead, pick **Staff** (reports only) or **Admin** (everything). They need only a name and email.

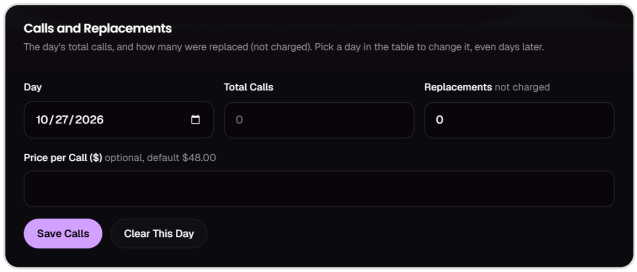

Changing a buyer's terms

Open the buyer from **Logins** and use **Billing Terms**. A new price applies to days you enter from then on; days already entered keep the price they had.

Entering daily calls and replacements

On the buyer's page, **Calls and Replacements** takes one day at a time:

1. Pick the **Day**.
2. Enter **Total Calls** for that day.
3. Enter **Replacements**: calls that were replaced and are **not charged**. Leave it at 0 if there were none.
4. Leave **Price per Call** empty to use the buyer's price, or type a different price for that day only.
5. Select **Save Calls**.

Calls and Replacements

Replacements often come in a day or two later. To change a day, select it in the table further down the page; the form fills with that day, and you correct it and save. **Clear This Day** removes a day you entered by mistake.

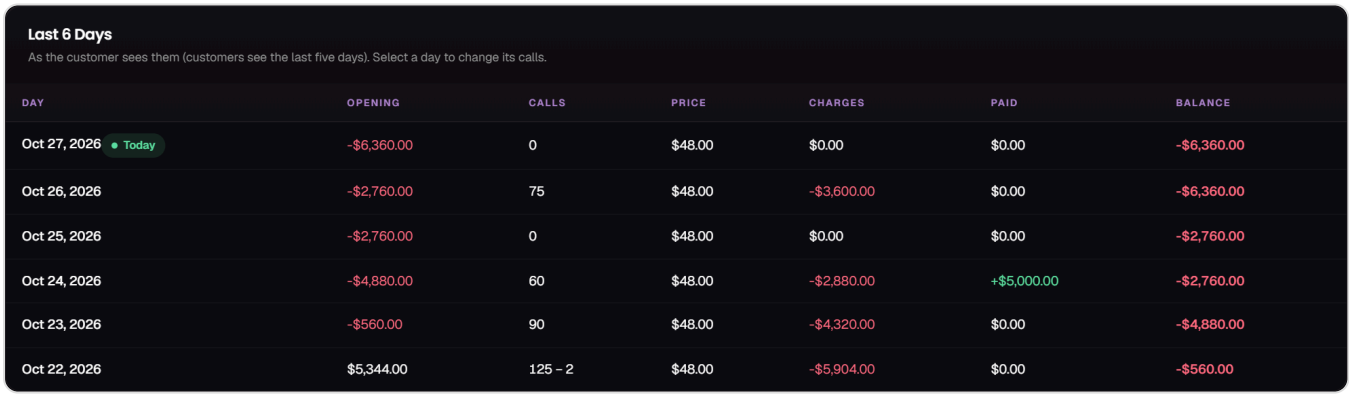

You can also enter many days at once from a billing report. See section 5.

How the balance is worked out

Each day opens on the previous day's closing balance. Then:

> **Call charges** = (total calls − replacements) × price per call
> **Closing balance** = opening balance − call charges + payments received

For example, BluePeak Media pays $48 a call and opened Oct 22 at $5,344.00. That day had 125 calls with 2 replaced, shown as **125 − 2**. So 123 calls are charged: 123 × $48 = $5,904.00, and the day closes at −$560.00. Oct 23 opens at −$560.00.

DAY	OPENING	CALLS	PRICE	CHARGES	PAID	BALANCE
Oct 27, 2026 • Today	-$6,360.00	0	$48.00	$0.00	$0.00	-$6,360.00
Oct 26, 2026	-$2,760.00	75	$48.00	-$3,600.00	$0.00	-$6,360.00
Oct 25, 2026	-$2,760.00	0	$48.00	$0.00	$0.00	-$2,760.00
Oct 24, 2026	-$4,880.00	60	$48.00	-$2,880.00	+$5,000.00	-$2,760.00
Oct 23, 2026	-$560.00	90	$48.00	-$4,320.00	$0.00	-$4,880.00
Oct 22, 2026	$5,344.00	125 – 2	$48.00	-$5,904.00	$0.00	-$560.00

The buyer's recent days, exactly as the buyer sees them

Because every balance is recalculated from the start date each time, **correcting an old day automatically corrects every later day** and the buyer's current balance. A negative balance (in red) is what the buyer owes; a positive one is credit.

4. Payments

Payments reach the portal in two ways: buyers pay online in USDT, or an admin records a payment that came in another way. Either way, a completed payment lowers what the buyer owes on the day it was received.

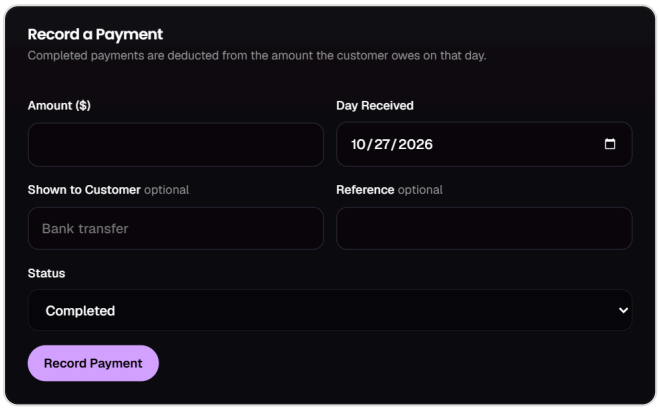

Online payments (USDT)

Buyers select **Pay Now** in their portal, choose an amount, and get their own USDT address on the TRON network (TRC-20). The address stays the same for every payment they make.

You don't need to do anything. The portal checks for deposits every few minutes. A deposit still being confirmed shows as **Pending**; once confirmed on the blockchain it becomes **Completed** and counts towards the balance.

Recording a payment yourself

For a bank transfer or any payment that didn't come through Pay Now, open the buyer's page and use **Record a Payment**:

Record a Payment

Field	What to enter
Amount	The amount received, in US dollars
Day Received	The day it arrived. It counts towards that day's balance
Shown to Customer	How it was paid, as the buyer will see it, e.g. *Bank transfer*
Reference	Your own reference, e.g. a transfer number (optional)
Status	**Completed** counts now. **Pending** is shown but not counted; once it clears, delete it and record it again as Completed. **Failed** is kept for the record only

A payment recorded by mistake can be deleted from the **Payments** list on the same page.

When a payment completes, the team and the buyer can be told automatically. See section 8.

5. Uploading reports

Staff and admins upload two kinds of report on the **Reports** page. Choose the kind under **Report Type**; the form also picks it for you when it recognises the file.

Report Type	What it is	Who sees it
Call Summary	The day's call log, as the dialer exports it	**The buyer**: they view and download it in their portal, and are told by email and Telegram
Billing Report	The day's billing figures (formats in section 6)	**The team only.** The buyer never sees it. An admin can enter its calls in the buyer's billing

Uploading a Call Summary

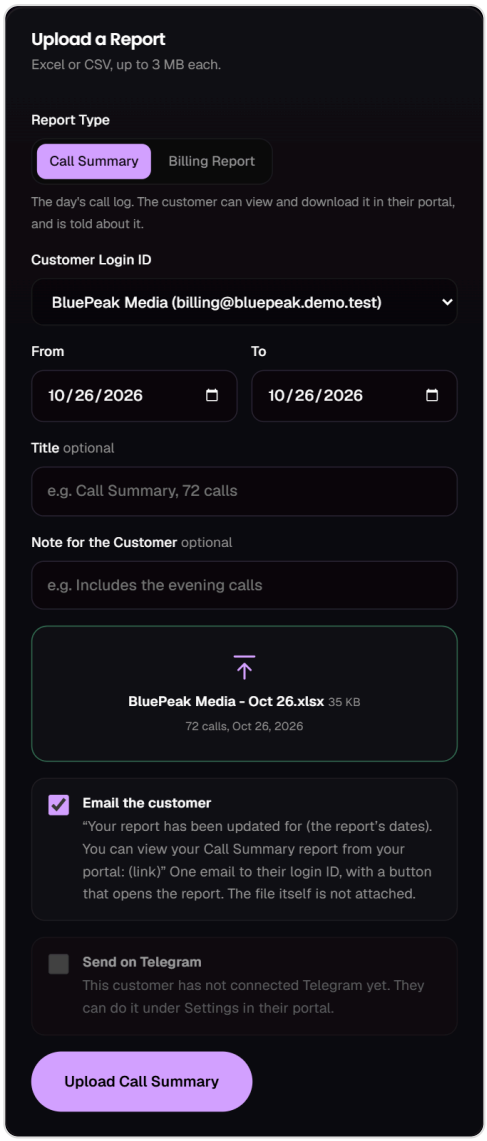

1. **Report Type**: Call Summary.
2. **Customer Login ID**: choose the buyer.
3. **Choose the file**: drop it on the box or click to pick it. Excel (.xlsx, .xls) or .csv, up to 3 MB each. You can pick several files at once.
4. For a call log straight from the dialer, the form counts the calls (*72 calls, Oct 26, 2026*) and fills in **From** and **To**. Any other layout is uploaded as it is; just set the dates yourself.
5. **Title** and **Note for the Customer** are optional. Without a title, a counted call log is named *Call Summary, 72 calls*.
6. Choose how to tell the buyer (below), then select **Upload Call Summary**. While the button reads *Reading the File…*, wait a moment.

When it is done, the form says *Call summary successfully uploaded for (the buyer's login)*, and adds a short note only if the email or Telegram message could not be sent.

Telling the buyer

- **Email the customer** sends: "*Your report has been updated for (the report's dates). You can view your Call Summary report from your portal: (link)*", with a button that opens it. The file itself isn't attached.
- **Send on Telegram** sends the same message, if the buyer has connected Telegram in their portal Settings.

Untick both when re-uploading a corrected file you don't want to announce. Either way, the buyer sees it under **Reports** and a notice on their home page. To take a report down, delete it from the **Uploaded** list on the same page.

A Call Summary ready to upload

Uploading a billing report (and entering its calls)

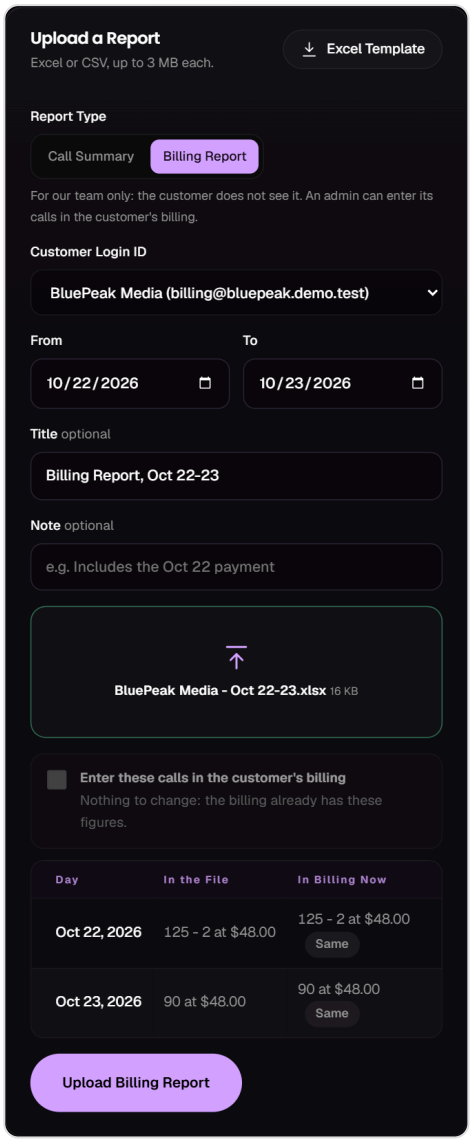

Choose **Billing Report**, the buyer and the file. A billing report never reaches the buyer and they are not told about it. For an admin, when the file is in one of the formats in section 6, the form lists each day it found beside what the buyer's billing has now:

Label	Meaning
New	The day isn't in billing yet
Changes	Billing has different figures for that day, e.g. replacements added in the report
Same	Nothing to change
Skipped	Not entered, with the reason: before billing started, a future day, or a row that couldn't be read

Check the table, then tick **Enter these calls in the customer's billing**. The new and changed days are saved once the report has uploaded, and each one is recorded in the Audit Log. The balances update straight away.

If you leave it unticked, **the report changes nothing in billing**. The report's balances and payments are never read either; the portal works those out itself, so a payment can't be counted twice.

Staff can upload billing reports but never see this table; only admins change billing.

A billing report, with the days read from the file

6. Report formats

Call Summary

Any Excel or CSV layout can be uploaded as a Call Summary. The call log as the dialer exports it works best: one call per row, no header, starting with the call's date and time. The form then counts the calls and fills in the dates, and the buyer's viewer adds the column names:

Date & Time	Caller	Number Called	Duration	Status	Hung Up By
2026-10-26 15:22:51	15552892372	18005550142	00:19:37	Completed - With Conversion	Caller

Billing reports

Any Excel or CSV file can be uploaded as a billing report. To have the portal **read the daily calls** from it (section 5), it must be in one of the two formats below. The **Financial Overview** format is the one the team already uses.

Format A: Financial Overview (one box per day)

Each day is a small box with a title row and two columns, Metric and Amount:

Oct 22, 2026 · Financial Overview	
Metric	Amount
Opening Balance ($)	$5,344.00
Total No.	125 - 2
Payment Received ($)	0
Balance	-$560.00

A day in the Financial Overview format

The portal reads only two things from each box:

What	Where	How to write it
The day	The title	`Oct 22, 2026 · Financial Overview`. The date comes first, then a dot (·) or a dash, then *Financial Overview*
The calls	The **Total No.** row	`125` when nothing was replaced, or `125 - 2` for 125 calls with 2 replaced (123 are charged)

Everything else in the box (Opening Balance, Payment Received, Balance) is for the buyer to read; the portal works those figures out itself.

- **Layout:** boxes can be stacked down one sheet, placed side by side, or put on separate sheets in the same file. A report covering a week can simply have seven boxes.
- **Dates** can be written *Oct 22, 2026*, *October 22, 2026*, *10/22/2026* or *2026-10-22*. Always include the year.
- **Price:** the box has no price, so each day is charged at the price the buyer's billing already has. If a day needs a different price, add a row named **Price per Call** to that box, or enter it on the buyer's page.
- **Replacements** can also go in their own row named **Replacements**, instead of "125 - 2".

Format B: the Excel Template (one row per day)

On **Reports**, select **Excel Template** to download a ready-made file. Its **Daily Bills** sheet has one row per day:

Date	Opening Balance ($)	Total Calls	Replacements	Price per Call ($)	Call Charges ($)	Payment Received ($)	Balance ($)
2026-10-22	5,344.00	125	2	48.00	5,904.00	0	-560.00
2026-10-23	-560.00	90	0	48.00	4,320.00	0	-4,880.00

The portal reads **Date**, **Total Calls**, **Replacements** and **Price per Call**. An empty price keeps the buyer's price.

Rules for both billing formats

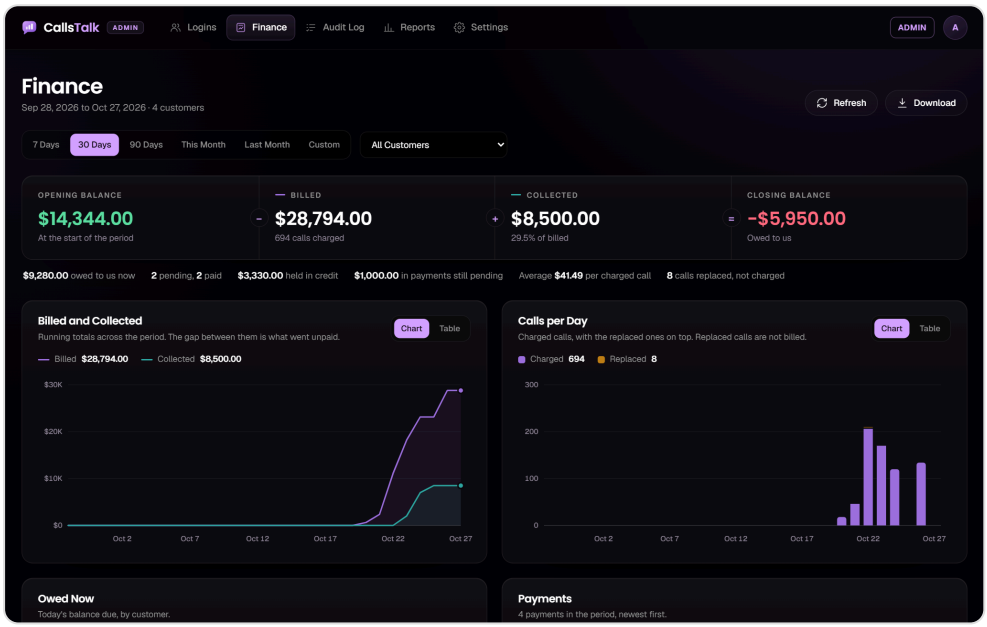

- **One buyer per file.** The file is uploaded for, and entered into, the buyer you choose.
- **Each day once.** A day that appears twice with different figures is skipped, since the portal can't know which is right.
- **Calls are whole numbers**, and replacements are never more than the day's calls.
- **No words in the calls cell.** A day with *n/a* or a blank there is listed as "not read" and left out; the other days still go in.

- **Only days from the buyer's billing start up to today** are entered. Future days are skipped.
- **Payments are never read from a report.** Record payments on the buyer's page (section 4), or let online payments come in by themselves.

The days table on the upload form always shows what the portal read before anything is saved, so a wrong cell is easy to spot and fix in the file.

7. The Finance page

Finance shows every buyer's standing in one place: what was billed, what was collected, and who owes what today.

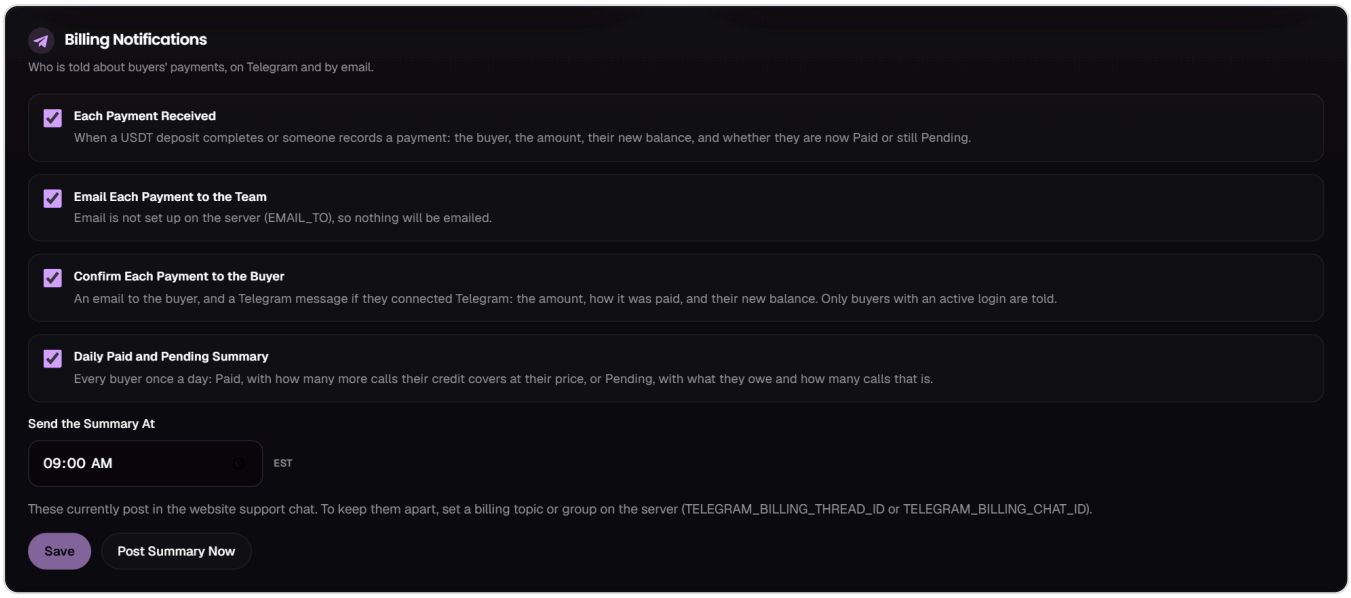

Finance: totals for the period, then charts, then each buyer

- **Period and buyer:** pick 7 Days, 30 Days, 90 Days, This Month, Last Month or Custom dates, and All Customers or a single buyer.
- **The four totals** read left to right as a sum: Opening Balance − Billed + Collected = Closing Balance for the period.
- **The line under them** gives today's picture: the total owed now, how many buyers are Pending and Paid, credit held, payments still pending, the average price per charged call, and how many calls were replaced.
- **Billed and Collected** and **Calls per Day** chart the period. Switch either to **Table** to see the figures.
- **Owed Now**, **Payments** and **By Customer** list who owes most first. Open a buyer from there to enter calls or payments.
- **Download** saves the page as a spreadsheet (CSV) or PDF, for your records or accounts.

8. Telegram and email notices

The portal keeps the team and buyers informed without anyone having to send messages by hand. Admins switch each notice on or off in **Settings** → **Billing Notifications**.

Billing Notifications in Settings

Notice	Who gets it	When
Each Payment Received	The team's Telegram billing chat	A USDT deposit completes or someone records a payment. Shows the buyer, amount, method, wallet or reference, new balance, **Status** (Paid or Pending), the calls that balance stands for (**Capacity** or **Unpaid Calls**) and the time
Email Each Payment to the Team	The team's inbox	The same moment, by email
Confirm Each Payment to the Buyer	The buyer, by email and on Telegram if connected	The same moment: the amount, how it was paid and their new balance
Daily Paid and Pending Summary	The team's Telegram billing chat	Once a day at the time you set (EST)
Report notices	The buyer, by email and Telegram	When a Call Summary is uploaded with those boxes ticked (section 5). Never for billing reports

No notice ever shows a buyer's price per call. The team's payment notice reads, for example:

```
Payment Received

Buyer: BluePeak Media
Amount: $1,500.00
Method: USDT (TRC-20)
Balance: $1,392.00
Status: Paid
Capacity: 29 calls
Time: 2:42 PM EST
```

The Daily Billing Summary

Every buyer is listed as **Paid** (in credit, with how many more calls their credit covers) or **Pending** (owing, with how many calls that stands for). Totals come first. In Telegram, the headings and labels appear in bold and each group sits in a box.

- **Confirming** appears only when a payment is still pending.
- Paid buyers closest to running out of credit come first; Pending buyers who owe most come first.
- Long names are shortened with "…" so the table fits a phone screen.

Need it now? Type **/buyers** in the team's support chat or billing chat, and the bot replies with the same summary as of that moment. **Post Summary Now** in Settings does the same from the portal.

```
Daily Billing Summary

Tue, Oct 27

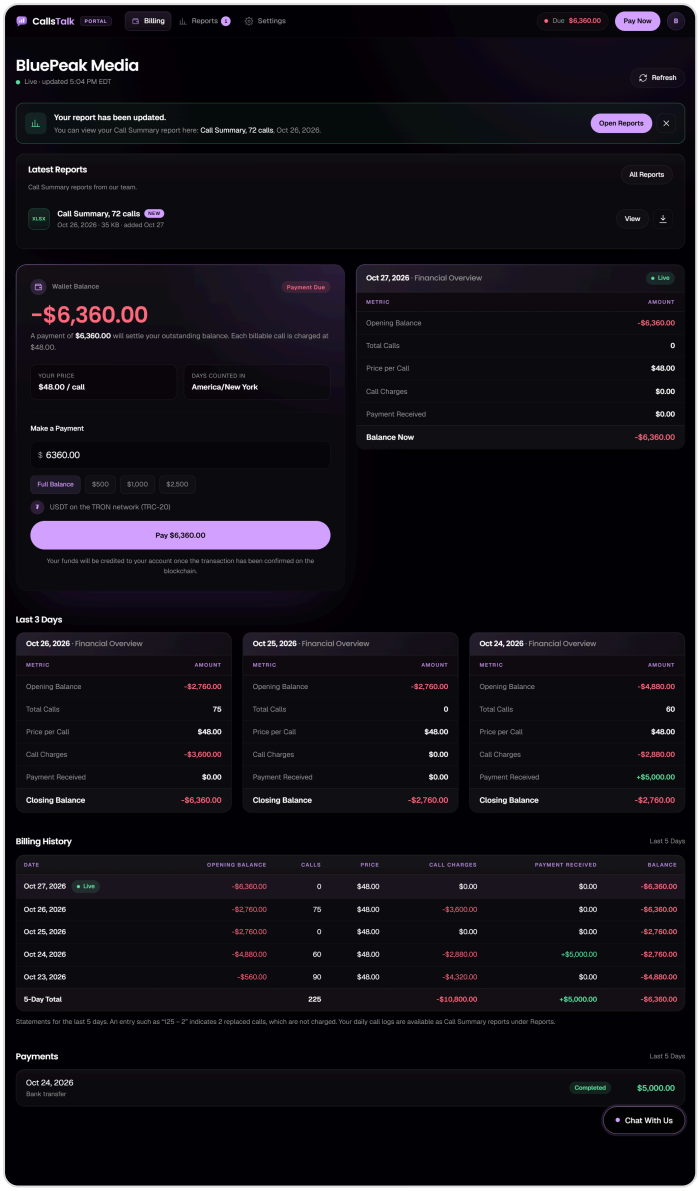

• Owed: $9,280.00
• Credit: $3,330.00
• Confirming: $1,000.00

Paid
Buyer                     Balance
Northwind Leads             1,140
Remaining Calls - 32
.............................
Buyer                     Balance
Summit Insurance Partn…     2,190
Remaining Calls - 73

Pending
Buyer                     Balance
BluePeak Media             -6,360
Unpaid Calls - 133
.............................
Buyer                     Balance
Harbor Health Plans        -2,920
Unpaid Calls - 73
```

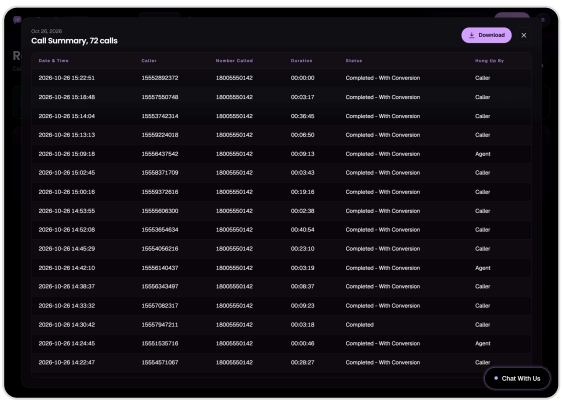

9. What buyers see

Buyers see exactly the figures you enter, worked out with the same rule, so what they see always matches the Finance page.

A buyer's home page: new Call Summary notice, balance, payment, and their last five days

- **Balance and Pay Now.** Their current balance, what is due, their price per call, and a payment box (full balance or a set amount, in USDT). The amount due also sits in the top bar on every page.
- **Today and recent days.** Today's Financial Overview updates live as you enter calls. Below it are the last three days as boxes, and the **Billing History** table for the last five days. "125 – 2" means 2 replaced calls that were not charged.
- **Payments** from the last five days, with how each was paid.
- **Call Summaries.** A notice when a new one arrives, the latest on the home page, and all of them by month under **Reports**, to view or download (below). Billing reports never appear here.
- **Settings.** Buyers change their password, add other ways to reach them (Telegram, Signal, email and others), and **connect Telegram** to get report and payment notices there. Their price and start date are shown but only the team can change them.
- **Chat With Us** opens a chat with the team, which arrives in the team's Telegram support group.

A Call Summary opened in the buyer's portal, with the column names added

10. Settings, Audit Log and quick answers

Settings holds your own password and, for admins, the Billing Notifications from section 8.

The **Audit Log** records every sign-in (including failed ones) and every change: logins created or reset, days entered, payments recorded, reports uploaded and notices changed. Each entry shows who did it and when. Filter by person, buyer, action or dates to answer "who changed this?".

Quick answers

Situation	What to do
A buyer says their balance is wrong	Open their page and check the days table. Correct the wrong day; every later day and their balance update by themselves
Replacements came in after the day	Select that day on the buyer's page, enter the replacements and save. Or upload the corrected report with **Enter these calls** ticked
A buyer's price changes	Change it in **Billing Terms**. Days already entered keep their old price
Does uploading a report change the balance?	Only a billing report, and only if an admin ticks **Enter these calls in the customer's billing**. A Call Summary never does
A buyer can't see a report	Buyers see only Call Summaries. Check it was uploaded with **Report Type: Call Summary** and for the right buyer
A report's days show **Skipped**	The reason is shown beside each day. Fix the file (section 6) and upload again
A report went to the wrong buyer	Delete it from the **Uploaded** list. If its calls were entered, clear or correct those days on that buyer's page
Someone lost their phone or authenticator	Open their login and select **Reset Login and Send Link**
Someone leaves the team, or a buyer stops	**Deactivate Login** stops them signing in and keeps their history. **Delete** removes the login and all its billing and reports for good
A buyer didn't get a report notice	Notices go out for Call Summaries only. Check their Login ID email. Telegram notices need the buyer to connect Telegram in their Settings
